

## **Smart-Tag Parent portal is being replaced with the new Smart-Tag Parent App**

Attention AVSTA parents!

The new and improved SMART tag Parent App will replace the Parent Portal effective July 1, 2024. We plan to have the App available for the 2024 – 2025 School year. Please keep checking our website for more information.

The New Parent App changes are as follows:

**SMART Locate:** You will no longer be able to view the bus for the entire route. Based on feedback from school districts nationwide and for the safety of students and drivers, the live map location of the bus will only be available from the time you receive the SMART Alert arrival notification (default 20 mins) up to the time the bus leaves your home stop.

The Parent App includes new features that let you choose a time setting for bus arrival notifications. You will also get notified each time your student loads and unloads the bus!

If you try to access the Parent Portal after we have migrated to the Parent App, you will be redirected to download the SMART tag Parent App. Your current settings will be transferred automatically.
